APPLICATIONS

The METALpro MP9500 Hydraulic Bender can be used on a variety of manufacturing professional and maintenance jobs. Using different die sets, the MP9500 can bend square and round tubing, pipe, and conduit up to 180º.

BENEFITS

- The most cost effective 180 degree bender on the market
- Wide range of bending applications
  - Square tubing
  - Round tubing
  - Pipe
  - Conduit
  - Round rod
- Works at any shop or job site with 110V, 20 amp outlet
- 3 year warranty
- Made in Hamilton, MI USA

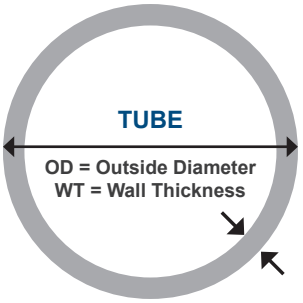
SPECIFICATIONS

Width	41"
Height	66"
Length	24"
Weight	325 pounds
Strokes per minute	approximately 2
Bending force	12 tons
Size range	½" up to 2" diameter
Maximum Bend	up to 180º per bend
Motor	1½ horsepower
Electrical	110V, 20 amp
Hydraulic power	self-contained, 2500 PSI
Hydraulic oil capacity	1.5 gallon

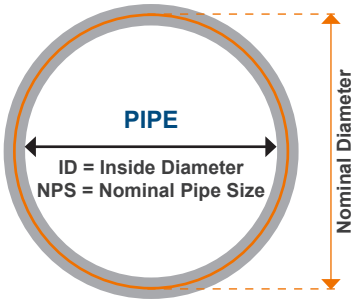
TUBE VS PIPE

A **tube** is a round or square hollow section measured by outside diameter (OD) and wall thickness (WT)

A **pipe** is a round tubular designated by a nominal pipe size (NPS or DN) that represents a rough indication of the pipe capacity



Tube Dimensions



NPS<14 inches: OD>NPS>ID
